

At the **Chair of Logistics and Supply Chain Management** of TUM School of Management we are looking for an interested and qualified

Student Assistant (m/f/d)

In the project "digital logistics", we support innovative logistics concepts by developing data-driven optimization methods. To achieve high user acceptance, these applications must be simple, transparent, and robust to empower users to understand, trust, and effectively utilize artificial intelligence technologies. Student assistants are offered the chance to get exciting insights into cooperative projects with enterprises in the logistics sector.

Highly motivated students who would like to support us in developing and implementing new solution algorithms that combine elements of operations research and machine learning methods should have the following competencies:

- Knowledge of at least one general-purpose programming language (e.g., Python, Julia, C++).
- Strong motivation and appreciation of collaborative teamwork, coupled with the ability to work independently and reliably.
- A particular interest in the logistics industry, especially in last-mile routing.

We offer flexible working hours and the option to work remotely. The workload can be adjusted to your preference during exam periods and semester breaks. Additionally, you will have direct contact with industry partners and the opportunity to write your thesis with us after demonstrating strong performance.

Begin: April 2024

Workload: 8 – 12 hours per week

Application: Until **3/15/2024** by sending an email to logistics.log@mgt.tum.de including your curriculum vitae and your latest transcript of records
